Settle

What is SELC?

Community project – helps:

- you match your electricity use with power from local renewable sources
- reduce your bills
- support local renewable energy - solar

The problem

Big energy companies:

- pay low for exporting surplus generation
- charge high for that same electricity
- bring electricity over long distances

The solution - SELC

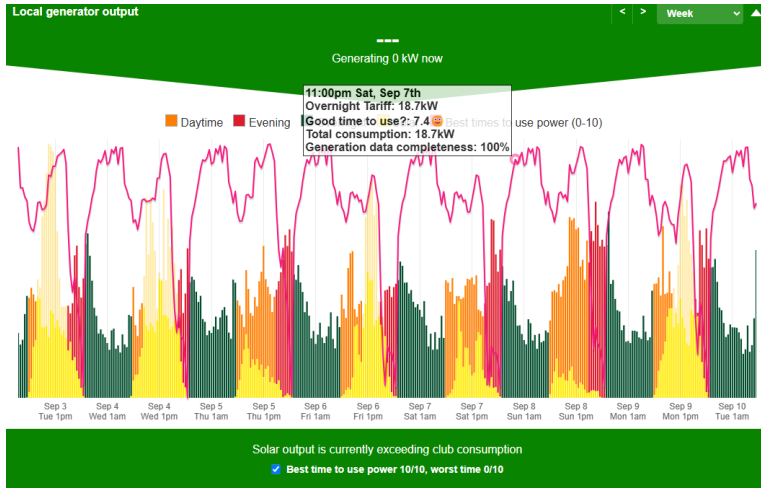

Community Co-operative Club

- Members: consumers, generators
- free smart meter
- local generation shared equally amongst members using power at that time
- Price agreed by Club
- Extra power from 100Green on 'Time of Use Tariff'

The solution - SELC

Co-operative Club:

Club Status

We are in the process of setting up the club, and we are looking for people who may be interested in joining.

I am interested in joining this club

If you would like to update your details, or add an extra premises, go to [Edit My Details](#).

Introduction: ACE Settle and area's energy group are setting up Settle Energy Local Club following the creation of a [Local Area Energy Plan](#) in 2023. The club will be made up of consumers, generators and consumer/generator members and will use as much locally generated renewable energy as possible within the Club area shown on the map below. You can assess your own roof's potential for solar PV panels using this [interactive map](#) commissioned by ACE as part of the Local Area Energy Plan
